

Akkujen ja aseiden yhteensopivuustaulukko

Lipoakut (LiPo)

Yhteensopivuustaulukko auttaa sinua valitsemaan sopivan akun aseeseesi. Tästä taulukosta löydät lipoakkujen yhteensopivuudet.

Lisääakuista ja toiminnasta voit lukea tarkemmin Tradetechistä [Airsoft-akkujen ABC](#)-artikkelistamme.

Merkkien selitykset:

- ✓ Akku on yhteensopiva
- ✗ Akku ei ole yhteensopiva
- 🟡 Yhteensopivuus vaatii muokkausta (Esim. akkutilan avartaminen hiomalla)
- ◤ Yhteensopiva rajoitteiden kanssa (Esim. vetoperää ei voi vetää pienimpään asentoon)
- * Akun liitin ei ole yhteensopiva.
Jos solu on tyhjä, yhteensopivutta ei ole testattu.

Huom! Yhteensopiva tarkoittaa vain sitä, että akku mahtuu aseeseen. Akussa saattaa silti olla eri liitin. Varmistathan siis, että aseessasi on sama liitin, hankit sopivan adapterin, tai osaat itse vaihtaa liittimen sopivaksi.
