

Akkujen ja aseiden yhteensopivuustaulukko

Nikkeliakut (NiMH)

Yhteensopivuustaulukko auttaa sinua valitsemaan sopivan akun aseeseesi. Tästä taulukosta löydät nikkeliakkujen yhteensopivuudet.

Lisää akuista ja toiminnasta voit lukea tarkemmin Tradetechistä [Airsoft-akkujen ABC](#) –artikkelistamme.

Merkkien selitykset:

- ✓ Akku on yhteensopiva
- ✗ Akku ei ole yhteensopiva
- Yhteensopivuus vaatii muokkausta (Esim. akkutilan avartaminen hiomalla)
- ✦ Yhteensopiva rajoitteiden kanssa (Esim. vetoperää ei voi vetää pienimpään asentoon)
Jos solu on tyhjä, yhteensopivuutta ei ole testattu.

Huom! Yhteensopiva tarkoittaa vain sitä, että akku mahtuu aseeseen. Akussa saattaa silti olla eri liitin. Varmistathan siis, että aseessasi on sama liitin, hankit sopivan adapterin, tai osaat itse vaihtaa liittimen sopivaksi.
